Dedication xvii

I. Dedication

Twenty years of proton microprobe research in biominerals: A tribute to Graeme Ernest Coote, 1935–1997
G.E. Coote (posthumously), R.W. Gauldie, W.J. Trompetter, I.C. Vickridge and A. Markwitz 1

II. Microbeam facilities

A new approach to nuclear microscopy: the ion–electron emission microscope
B.L. Doyle, G. Vizkelethy, D.S. Walsh, B. Senftinger and M. Mellon. 6

The CSIRO-GEMOC Nuclear Microprobe: a high-performance system based on a new closely integrated design
C.G. Ryan, D.N. Jamieson, W.L. Griffin and G. Cripps 18

The stand-alone microprobe at Livermore
M.L. Roberts, P.G. Grant, G.S. Bench, T.A. Brown, B.R. Frantz, D.H. Morse and A.J. Antolak 24

The ANSTO high energy heavy ion microprobe
R. Siegele, D.D. Cohen and N. Dytlewski 31

Microprobe as implanter for semiconductor devices
J. Meijer, A. Stephan, J. Adamczewski, H. Röcken, U. Weidenmüller, H.H. Bukow and C. Rolfs 39

Design and first results of the nuclear microprobe in Cracow
S. Lebed, M. Cholewa, Z. Cioch, B. Cleff, P. Golonka, D.N. Jamieson, G.J.F. Legge, S. Łazarski, A. Potempa, C. Sarnecki and Z. Stachura. 44

III. Microbeam lenses and optics

An extended magnetic quadrupole lens for a high-resolution nuclear microprobe
M.B.H. Breese, G.W. Grime, W. Linford and M. Harold 48

Bright ion beams for the nuclear microprobe
S. Kalbitzer 53

The optimal construction of an electrostatic quadruplet as focusing microprobe system
A.H. Azbaid, A.D. Dymnikov and G. Martínez 61

0168-583X/99/$ - see front matter © 1999 Elsevier Science B.V. All rights reserved.

A method for microbeam spot particle distribution measurements
J. Nickel 66
A superconducting multipole lens for focusing high energy ions
G. Datzmann, G. Dollinger, G. Hinderer and H.-J. Körner. 74
Characterisation of lens aberrations and parasitic fields using beam rocking
D.G. de Kerckhove, M.B.H. Breese, D.N. Jamieson and G.W. Grime 81
High-frequency focusing system for nuclear microprobes
A.D. Dymnikov and G. García. 85
Experimental ray-tracing – a precise and accurate method for the determination of the properties of optical systems
M. Maetz, A. Núñez-Ruiz, T. Schneider, S. Scheloske, A. Wallianos, C. Wies and K. Traxel. 90
A high performance quadrupole quintuplet lens system for the CSIRO–GEMOC nuclear microprobe
C.G. Ryan and D.N. Jamieson 97
A novel high precision slit system
O. Schmelmer, G. Dollinger, G. Datzmann, C. Goeden and H.-J. Körner 107
Nonlinear effects in fine focus applications with quadrupole multiplets and solenoids
H. Wollnik and M.I. Yavor 113
A liquid metal ion source in a high energy microprobe setup
J. Adamczewski, A. Stephan, J. Meijer, H.W. Becker, H.H. Bukow and C. Rolfs 119

IV. Data acquisition and analysis

The remote control of nuclear microprobes over the Internet
C.L. Churms, V.M. Prozesky and K.A. Springhorn 124
VIBA-LAB2: a virtual ion beam analysis laboratory software package incorporating elemental map simulations
S.J. Zhou, I. Orlic, J.L. Sanchez and F. Watt. 129
A system for on-line monitoring of light element concentration distributions in thin samples
P.J.M. Brands, P.H.A. Mutsaers and M.J.A. de Voigt 135
The layout and performance of the Lund nuclear microprobe trigger and data acquisition system
M. Elfman, P. Kristiansson, K. Malmqvist and J. Pallon 141
A flexible LabVIEW™-based data acquisition and analysis system for scanning microscopy
D.H. Morse, A.J. Antolak, G.S. Bench and M.L. Roberts. 146
Rutherford backscattering analysis on thin crystals modelled using a Bloch-wave formulation
J.L. den Besten, D.N. Jamieson and L.J. Allen. 153
A neural network approach for micro-PIXE data
E. Rokita, P.H.A. Mutsaers, J.A. Quaedackers, Z. Tabor and M.J.A. de Voigt. 159

V. Microbeam irradiation effects

Focused high energy proton beam micromachining: A perspective view
F. Watt. 165
Micromachining of silicon with a proton microbeam
P. Polesello, C. Manfredotti, F. Fizzotti, R. Lu, E. Vittone, G. Lerondel, A.M. Rossi, G. Amato, L. Boarino, S. Galassini, M. Jaksic and Z. Pastuovic 173
Resist materials for proton micromachining
J.A. van Kan, J.L. Sanchez, B. Xu, T. Osipowicz and F. Watt 179
Proton micromachining of substrate scaffolds for cellular and tissue engineering
J.L. Sanchez, G. Guy, J.A. van Kan, T. Osipowicz and F. Watt 185
Noise-induced local heatings in microbeam analysis
G. Plumereau, F. Ladieu and P. Berger 190

VI. Microprobe analytical techniques

The use of molecular beams in nuclear microprobe imaging
V.M. Prozesky, J. Padayachee, A. Saint and K. Springhorn. 194
In situ microanalysis for trace element and isotopic data by AMS
S.H. Sie, D.A. Sims, T.R. Niklaus, F. Bruhn, G. Suter and G. Cripps 201
Application of a Clover–Ge–BGO detector system for PIGE measurements at a nuclear microprobe
Z. Elekes, Á.Z. Kiss, Gy. Gyürky, E. Somorjai and I. Uzonyi 209
Micro-XANES with synchrotron radiation: a complementary tool of micro-PIXE and micro-SXRF for the determination of oxidation state of elements. Application to geological materials
M. Mosbah, J.P. Duraud, N. Métrich, Z. Wu, J.S. Delaney and A. San Miguel 214
Nuclear microprobe and nuclear reaction spectrometry at a few square micrometer level: myth or reality
P. Trocellier, P. Berger, B. Berthier, E. Berthoumieux, J.P. Gallien, N. Metrich, C. Moreau, M. Mosbah and M.E. Varela 221
Depth profiling of light elements using a nuclear microprobe
G. Terwagne, F. Bodart and G. Demortier 228
Ion optical study of a transmission ion microscope
M.B.H. Breese and D.N. Jamieson 236
High-energy resolution PIXE study of heat induced changes in cadmium compounds using ion microbeam
T. Tadić, Y. Mokuno, Y. Horino, M. Jakšić, I.D. Desnica and R. Trojko 241

VII. Single ions and effects

An example of what you can miss in single-event-effect testing, when you do not have a microprobe
B.E. Fischer, M. Schlögl, J. Barak, E. Adler and S. Metzger 245
Single ion hitting to living samples
T. Sakai, Y. Naitoh, T. Kamiya and Y. Kobayashi 250
An automated single ion hit at JAERI heavy ion microbeam to observe individual radiation damage
T. Kamiya, T. Sakai, Y. Naitoh, T. Hamano and T. Hirao 255
Studies of charge collection mechanisms in SOI devices using a heavy-ion microbeam
T. Hirao, T. Hamano, T. Sakai and I. Nashiyama 260
Ion beam induced charge collection (IBICC) of integrated circuits using a 10 MeV carbon microbeam
F.D. McDaniel, B.N. Guo, S.N. Renfrow, M. El Bouanani, J.L. Duggan, B.L. Doyle, D.S. Walsh and T.J. Aton. 264

VIII. Applications in archaeology

Post-mortem intake of lead in 11th century human bones and teeth studied by milli- and microbeam PIXE and RBS
R. Brenn, Ch. Haug, U. Klar, S. Zander, K.W. Alt, D.N. Jamieson, K.K. Lee and H. Schutkowski. . . . 270
PIXE in an external microbeam arrangement for the study of finely decorated tartesic gold jewellery items
G. Demortier, F. Fernandez-Gomez, M.A. Ontalba Salamanca and P. Coquay. 275
Nuclear microprobe study of metal segregation in quaternary bronze
F. Munnik, K.A. Sjöland, G. Vittiglio, C. Ingelbrecht and U. Wätjen 281
Application of microPIXE and STIM in analyses of fossil and Recent polychaete jaws (scolecodonts)
M. Elfman, M. Eriksson, P. Kristiansson, K. Malmqvist and J. Pallon. 287

IX. Applications in biology

Low-dose nuclear microscopy as a necessity for accurate quantitative microanalysis of biological samples
M. Maetz, W.J. Przybylowicz, J. Mesjasz-Przybylowicz, A. Schüßler and K. Traxel. 292

The identification of growth lines in abalone shell using a nuclear microprobe
A.A. Bettiol, C. Yang, G.P. Hawkes, D.N. Jamieson, K.G. Malmqvist and R.W. Day 299
Micro-PIXE studies of elemental distribution in seeds of *Silene vulgaris* from a zinc dump in Olkusz, southern Poland
J. Mesjasz-Przybyłowicz, K. Grodzińska, W.J. Przybyłowicz, B. Godzik and G. Szarek-Łukaszewska . . . 306
Elemental analysis of single phytoplankton cells using the Lund nuclear microprobe
J. Pallon, M. Elfman, P. Kristiansson, K. Malmqvist, E. Granéli, A. Sellborn and C. Karlsson 312
Micro-PIXE studies of Cd distribution in the nephridia of the earthworm *Eisenia fetida* (Oligochaeta)
M.W. Prinsloo, S.A. Reinecke, W.J. Przybylowicz, J. Mesjasz-Przybylowicz and A.J. Reinecke 317
Nuclear microprobe studies of elemental distribution in the seagrass *Thalassodendron ciliatum*
A.D. Barnabas, W.J. Przybylowicz, J. Mesjasz-Przybylowicz and C.A. Pineda. 323
Micro-PIXE studies of elemental distribution in Cd-accumulating *Brassica juncea* L.
T. Schneider, A. Haag-Kerwer, M. Maetz, M. Niecke, B. Povh, T. Rausch and A. Schüßler 329
Micro-PIXE mapping of elemental distribution in arbuscular mycorrhizal roots of the grass, *Cynodon dactylon,* from gold and uranium mine tailings
I.M. Weiersbye, C.J. Straker and W.J. Przybylowicz. 335

X. Applications in medicine

Iron in hereditary retinal degeneration: PIXE microanalysis Preliminary results
C. Sergeant, B. Gouget, Y. Llabador, M. Simonoff, M. Yefimova, Y. Courtois and J.C. Jeanny. 344
Iron and cell death in Parkinson's disease: a nuclear microscopic study into iron-rich granules in the parkinsonian substantia nigra of primate models
P.S.P. Thong, F. Watt, D. Ponraj, S.K. Leong, Y. He and T.K.Y. Lee. 349
Nuclear microscopy investigations into the role of iron in atherosclerosis
J. Makjanic, D. Ponraj, B.K.H. Tan and F. Watt. 356
STIM tomography at the cell level
C. Michelet and Ph. Moretto 361
Microanalysis of platinum in tumor nodules after cisplatin treatment with different modes of local administration
Ph. Moretto, C. Duvillard, L. Benoit, B. Chauffert and C. Michelet. 368
Extracellular matrix and culture substratum effects on trace metal content of epithelial cancer cells
R. Ortega, P. Gonçalves, Y. Llabador and M. Simonoff 375
Influence of an external medium on the ionic distribution in human allantochorial placental vessels
Ph. Moretto, M. Bara, A. Guiet-Bara and C. Michelet 380
Microanalysis of the human skin structure: preliminary results
Ph. Moretto, J.E. Surleve-Bazeille, D. Licu, C. Michelet and P. Stoedzel 386
Microprobe analysis of teeth by synchrotron radiation: environmental contamination
T. Pinheiro, M.L. Carvalho, C. Casaca, M.A. Barreiros, A.S. Cunha and P. Chevallier 393
State and history of heart tissue preparation for proton microprobe elemental analysis at the Eindhoven Cyclotron Laboratory
J.A. Quaedackers, P.H.A. Mutsaers, J.J.M. de Goeij, M.J.A. de Voigt and G.J. van der Vusse. 399
Determination of the intracellular element concentrations in cultured H9c2 cells by proton microprobe techniques
J.A. Quaedackers, S. van Engeland, P.H.A. Mutsaers, J.J.M. de Goeij, L.H.E.H. Snoeckx, M.J.A. de Voigt and G.J. van der Vusse 405
Bone mineralization after strontium and fluoride treatment in osteoporosis
E. Rokita, P.H.A. Mutsaers, J.A. Quaedackers, G. Tatoń and M.J.A. de Voigt 412
Changes in calcium and iron levels in the brains of rats during kainate induced epilepsy
M.-Q. Ren, W.-Y. Ong, J. Makjanic and F. Watt. 418

XI. Applications to electronics and photonics

Time-resolved ion beam induced charge collection (TRIBICC) in micro-electronics
H. Schöne, D.S. Walsh, F.W. Sexton, B.L. Doyle, P.E. Dodd, J.F. Aurand and N. Wing 424
Reliability testing for the next generation of ULSI with SOI MOSFETs
M. Takai, K. Nakayama, H. Takaoka, T. Iwamatsu, Y. Yamaguchi, S. Maegawa, T. Nishimura, A. Kinomura and Y. Horino 432
Ion microbeam studies of cadmium zinc telluride radiation detectors by IBICC
G. Vízkelethy, B.A. Brunett, D.S. Walsh, R.B. James, R.W. Olsen and B.L. Doyle 437
Analysis of solar cells using the IBIC technique
K.K. Lee and D.N. Jamieson 445
Elastic recoil detection analysis for the determination of hydrogen concentration profiles in switchable mirrors
M.C. Huisman, S.J. van der Molen and R.D. Vis 451
New developments in IBIC for the study of charge transport properties of radiation detector materials
M. Jakšić, Ž. Pastuović and T. Tadić 458
Scanning ion deep level transient spectroscopy
J.S. Laird, R.A. Bardos, C. Jagadish, D.N. Jamieson and G.J.F. Legge 464
IBIC analysis of gallium arsenide Schottky diodes
E. Vittone, F. Fizzotti, K. Mirri, E. Gargioni, P. Polesello, A. LoGiudice, C. Manfredotti, S. Galassini, P. Rossi, P. Vanni and F. Nava 470
Evaluation of the diffusion length in silicon diodes by means of the lateral IBIC technique
E. Vittone, F. Fizzotti, E. Gargioni, R. Lu, P. Polesello, A. LoGiudice, C. Manfredotti, S. Galassini and M. Jaksic 476
Investigation of light emitting diodes using nuclear microprobes
C. Yang, A. Bettiol, D. Jamieson, X. Hua, J.C.H. Phang, D.S.H. Chan, F. Watt and T. Osipowicz 481
Impurity incorporation during beam assisted processing analyzed using nuclear microprobe
Y.K. Park, M. Takai, C. Lehrer, L. Frey and H. Ryssel 487
Investigation of Cu films by focused ion beam induced deposition using nuclear microprobe
Y.K. Park, M. Takai, C. Lehrer, L. Frey and H. Ryssel 493

XII. Applications to environmental sciences

Airborne particulate matter localisation in the human respiratory system
T. Pinheiro, L.C. Alves, A. Bugalho de Almeida, M.J. Palhano, E. Pålsgård and G.W. Grime 499
The application of micro-PIXE simulation code in the quantitative analysis of environmental samples
I. Orlic, S. Zhou and F. Watt 505
Nuclear microprobe applications to radioactive waste management basic research
P. Trocellier, V. Badillo, N. Barré, L. Bois, C. Cachoir, J.P. Gallien, S. Guilbert, F. Mercier and C. Tiffreau 511
Verification of a uranium micromass standard using the Eindhoven Scanning Microprobe
D.P.L. Simons, A. Lagerwaard, P.H.A. Mutsaers and M.J.A. de Voigt 517

XIII. Applications to geology and planetary sciences

Advances in fluid inclusion analysis using the nuclear microprobe
C. Ryan 523
Fluid inclusion depth and thickness estimates using a Na nuclear reaction resonance and Si elastic scattering
B. Ménez, P. Philippot, M. Bonnin-Mosbah and F. Gibert 533
On the Q-phase of carbonaceous chondrites
R.D. Vis and D. Heymann 538
PIXE and light element analysis (C,N) in glass inclusions trapped in meteorites with the nuclear microprobe
M.E. Varela, M. Mosbah, N. Métrich, J.P. Duraud and G. Kurat 544

Milli-PIXE of coexisting cooperite and braggite – a comparison with electron probe microanalysis
C.B. Franklyn and R.K.W. Merkle 550
Milli-PIXE determination of trace elements in osmium-rich platinum-group minerals from the Witwatersrand basin, South Africa
R.K.W. Merkle and C.B. Franklyn 556
Boron distributions in single crystals investigated with nuclear reaction micro analysis
P. Kristiansson, U. Hålenius, H. Skogby, M. Elfman, K. Malmqvist and J. Pallon 562
Lithium and boron distributions in geological samples
W.J. Trompetter, A.G. Reyes, I.C. Vickridge and A. Markwitz 568
Nuclear microprobe analysis of serpentine from the mid-Atlantic ridge
B. Orberger, N. Metrich, M. Mosbah, C. Mével and Y. Fouquet 575
The sensitive determination of H in diamond by infrared (FTIR) spectroscopy and micro-elastic-recoil (μ-ERDA) techniques
R.J. Sweeney, V.M. Prozesky, K.S. Viljoen and S. Connell 582
PIXE microanalysis of gold-pyrite associations from the Kimberley Reefs, Witwatersrand basin, South Africa
S.N. Foya, W.U. Reimold, W.J. Przybylowicz and R.L. Gibson 588
Micro-PIXE analysis of varied sulfide populations from the Ventersdorp Contact Reef, Witwatersrand basin, South Africa
W.U. Reimold, W. Przybylowicz and C. Koeberl 593
Nuclear microprobe (PIXE) analyses of zircons as indicators of granite type
R. Scheepers, L.E. Cousin, W.J. Przybylowicz and V.M. Prozesky 599
Proton micro-probe analysis of a speleothem from South Africa
S.J. Piketh, E. Sideras-Haddad, K. Holmgren and P.D. Tyson 606
Anomalous Fe and Mn heterogeneity observed in microscopic inclusions in diamond using nuclear microscopy
E. Sideras-Haddad, R.J. Hart, S.H. Connell, J.P.F. Sellschop and M. Tredoux 612
U–Th–Pb chemical dating of monazites using the proton microprobe
F. Bruhn, A. Möller, S.H. Sie and B.J. Hensen 616
Trace element analyses of melt inclusions as probes for the evolution of Bolivian tin porphyry deposits
A. Wallianos, A. Dietrich, B. Lehmann, M. Mosbah and K. Traxel 621

XIV. Applications to materials sciences

New problems in nuclear microprobe analysis of materials
D.N. Jamieson, D.R. Beckman, A.A. Bettiol, J.S. Laird, K.K. Lee, S. Prawer, A. Saint, L.C.G. Witham and C. Yang 628
Microprobe applications for the characterization of catalyst systems
E. Taglauer, H. Knözinger and S. Günther 638
Hydrogen and deuterium depth profiling in divertor tiles of a fusion experiment by micro-ERDA
D. Grambole, F. Herrmann, R. Behrisch and W. Hauffe 647
Channeling contrast microscopy of GaN and InGaN thin films
T. Osipowicz, S.Y. Chiam, F. Watt, G. Li and S.J. Chua 653
Three-dimensional scanning of ion-implanted porous silicon
A. Simon, F. Pászti, A. Manuaba and Á.Z. Kiss 658
Newsprint smearing – an industrial problem studied with the nuclear microprobe
P. Kristiansson, T. Larsson, S. Malmberg, L. Malmqvist, M. Elfman, K. Malmqvist and J. Pallon 665
Nuclear microbeam study of advanced materials for fusion reactor technology
L.C. Alves, E. Alves, G.W. Grime, M.F. da Silva and J.C. Soares 671
Characterising palladium–silver and palladium–nickel alloy membranes using SEM, XRD and PIXE
J.N. Keuler, L. Lorenzen, R.D. Sanderson, V. Prozesky and W.J. Przybylowicz 678
Aluminium and silicon determination on two Si–Al sputter targets used for magnetron sputtering
G. Terwagne and F. Bodart 683

Silver intercalation in titanium disulphide
J. Heitmann, J. McCallum, W. Tröger and T. Butz 689
Nuclear microprobe and optical investigation of sparkling wine bottles
J. Padayachee, V.M. Prozesky and C.A. Pineda 695
Oxygen surface studies in ultra-thin diamond using a resonance reaction and transmission channelled Rutherford forward scattering
D.B. Rebuli, P. Aggerholm, J.E. Butler, S.H. Connell, T.E. Derry, B.P. Doyle, R.D. Maclear, J.P.F. Sellschop and E. Sideras-Haddad 701
Hydrogen 3D distribution in solids by ERDA imaging
C. Yang, E.J. Teo, T. Osipowicz, F. Watt, D. Jamieson, K.K. Lee and B. Tomcik 706
Study of Pd/Ge interaction in a lateral diffusion couple by microbeam Rutherford backscattering spectrometry
C.L. Churms, C.M. Comrie and R.S. Nemutudi 713
Lateral diffusion study of the Pt–Al system using the NAC nuclear microprobe
H. de Waal and R. Pretorius 717
Application of an ion microbeam to the study of multiphase borocarbides
P. Berger, E. Tominez, E. Alleno and C. Godart 722
A method for constructing multi-layered thickness profiles from micro-PIXE line-scans
J. Nickel and A.N. Shuaib 729

Author index 737
